Introduction

»DIE kleine BERLIN-STATISTIK 2015« (statistics for the City of Berlin 2015, key facts and figures) offers information on the development of the German capital, based on the most important statistical results.

Benchmarks to demographic, economic, social, cultural and political structures of Berlin are presented in Chapter 1 to 27. The results are compared to previous years. The brochure also contains information on the city's boroughs (Chapter 28), data on Berlin's development since 1871 (Chapter 29) and figures for the region of Berlin/Brandenburg (Chapter 30).

On December 31, 2014 the area of Berlin covered 892 km². More than 41 percent of it were buildings and associated open spaces and nearly 15 percent traffic areas. Recreation area covered 12 and production area 0.6 percent.

In 2014, Berlin had more than 37 thousand live births. The number of deaths was more than 32 thousand, which leads to a surplus of births of 5 thousand people. Berlin registered in 2014 a migration surplus of approximately 40 thousand people. At the end of 2014 Berlin had nearly 3.5 million inhabitants, 48 thousand persons more compared to the beginning of the year. About 497 thousand foreigners lived in Berlin at the end of 2014.

14 National Accounts

National accounts (VGR) are a statistical system for presenting a comprehensive, overall view of the economic activities of all business entities in Berlin. They are based on the European System of national accounts (ESA 2010) and the Classification of Industries (WZ 2008). At the centre of national accounts is the origin of the gross domestic product (GDP) as a measure of performance in Berlin.

The figures on the number of employed persons correspond to the workplace concept; that is, all employed persons who have their job in Berlin are taken into consideration. In the result for income creation the figure for employee earnings reflects all of the cash and non-cash benefits accrued to employees working in Berlin from work or other employment relationships.
